

3 Courses

Generative AI: Introduction and Applications

Generative AI: Prompt Engineering Basics

Generative AI: Elevate Your
Data Science Career

Jun 27, 2024

Jianyang Wu

has successfully completed the online, non-credit Specialization

Generative Al for Data Scientists

By completing this specialization, the learner has demonstrated the ability to differentiate generative AI from discriminative AI, describe real-world generative uses, and identify and use popular generative AI models and tools for text, code, image, audio, and video generation. The learner can explain generative AI prompt engineering concepts, provide examples, and apply prompt engineering techniques that create demonstrably useful outcomes. The learner can identify useful, appropriate generative AI tools for data science and apply generative AI prompt techniques to tasks throughout the data methodology process including data set generation data set augmentation, and machine learning model development and refinement, visualizations, and insights.

Pay Abuia

Rav Ahuja Global Program Director, Skills Network

Abhishek Gagneja Python and Al Subject Matter Expert

Antonio Cangiano

Antonio Cangiano Engineering Manager and Al Specialist IBM Digital Business Group

Dr. Pooja Instructor and Subject Matter Expert Skill-Up Technologies

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
